into a Tig welding lab, scopes of work will include upgraded electrical and air filtration systems, installation of a demising partition and thirteen new welding machines.

PROGRESS SUMMARY

Apr 28, 2021: Construction is 85% complete and ahead of schedule. The contractual substantial completion date is 08.03.21. As the academic program requested the use of the facility early the design and construction team have made all efforts to comply with their request and are working to achieve substantial completion on 05.10.21. Construction of the new Composites Lab has been completed and the equipment move from the existing lab to the new lab has started. The HVAC work is 80% complete in the Sheet Metal-Fabrication Shop. In the Welding Lab the HVAC work is 75% complete and the twenty-eight (28) new Lincoln Electric welding machines are being assembled and placed in the welding booths for final connections. The contractor is scheduling their work around the academic programs so as to cause minimal disruption of course work.
